PROFILE

Senior Data Engineer with almost 6 years of experience building cloud data pipelines on Microsoft Azure and Databricks. I design scalable ETL/ELT solutions with Apache Spark (PySpark), Python and SQL on the Lakehouse architecture, with a focus on data quality, governance with Unity Catalog, and automated deployment with Databricks Asset Bundles and CI/CD. Certified Databricks Data Engineer Associate (May 2026). Based in Milan and looking for a Senior Data Engineer role in Canton Ticino, Switzerland.

PROFESSIONAL EXPERIENCE

Avvale (formerly Techedge Group) · Milan, Italy · Nov 2020 - present

Senior Data Engineer Nov 2025 - present

- Design and develop pipelines with Apache Spark (PySpark), SQL and Python on the Databricks Lakehouse, following the Medallion Architecture.
- Build declarative pipelines with Delta Live Tables (Lakeflow Declarative Pipelines) and orchestrate them with Databricks Workflows.
- Implement data governance and access control with Unity Catalog.
- Automate deployment of pipelines and jobs with Databricks Asset Bundles and CI/CD practices, using Git for version control.
- Optimize Spark workloads for performance and cost efficiency, with attention to data quality.

Data Engineer May 2021 - Nov 2025

- Designed, built and maintained ETL/ELT pipelines for clients across different industries, progressing from the Azure ecosystem to the Databricks platform.
- 2021-2023: developed data integration and transformation pipelines on Microsoft Azure (Azure Data Factory); earned the Azure Data Engineer Associate (DP-203) certification in 2022.
- From 2023: moved to Databricks projects, building scalable pipelines with Apache Spark (PySpark), SQL and Python on the Lakehouse architecture, applying the Medallion pattern and Spark performance tuning.
- Worked with Azure Data Lake Storage, Azure Synapse and Azure Key Vault, with attention to data quality and governance.

Intern, Data Engineering Nov 2020 - Apr 2021

- Supported the team in developing and testing ETL pipelines on Azure.
- Learned data integration and transformation fundamentals with SQL and Python.

TECHNICAL SKILLS

- **Data platform:** Databricks, Delta Lake, Unity Catalog, Delta Live Tables, Databricks Workflows, Databricks Asset Bundles, Medallion Architecture, Lakehouse
- **Processing and languages:** Apache Spark, PySpark, Python, SQL
- **Azure:** Azure Data Factory, Data Lake Storage, Synapse, Key Vault
- **Engineering practices:** ETL/ELT, CI/CD, Git, Spark performance tuning, data quality and governance
- **Databases:** MySQL, NoSQL, MongoDB

CERTIFICATIONS

- Databricks Certified Data Engineer Associate, Databricks, May 2026 (valid to May 2028)
- Microsoft Certified: Azure Data Engineer Associate (DP-203), Microsoft, May 2022 (exam retired in Mar 2025)
- Cisco CCNA, Cisco, May 2019 (earned in High school)

EDUCATION

- **BSc in Computer Engineering**, Università degli Studi eCampus, 2021 - 2025 (while working full-time)
- **High school diploma in Information Technology**, ITI E. Torricelli, 2015 - 2020

LANGUAGES

- Italian (native)
- English (B2)

SIDE PROJECTS

- Aperidata – Data storytelling project that turns Italian public data (ISTAT) into charts published on Instagram/TikTok/YouTube. Python pipeline: ingests ISTAT's SDMX REST API with rate limiting, retries and Parquet caching; selects and validates series with rule-based data-quality checks; renders carousels and animated videos with Jinja2, Playwright and ffmpeg. GitHub
- OOrbit – Mobile game built with Flutter/Dart and published on the Apple App Store; Apple Store
- Hyperboola – project website in React deployed on Vercel, versioned with Git/GitHub. Hyperboola

AI-assisted development.
